MECHANICAL CONVEYING

 ENGLISH

Conveyors transport wooden material such as chips, dust and fiber to the various areas of the plant. Belt conveyors and redlers transport the material horizontally, whereas bucket elevators convey the material vertically.

Dosing bunkers are provided with a series of screws for the extraction of material. The dimensions of the series of screws vary according to the desired throughput. Each screw has an independent gearmotor.

Advantages

- **Constant extraction capacity of the screw**
- **Regulating rotation velocity**
- **Accurate dosing precision**

Delivering innovation respecting the environment
